

Enterprise Battery Management Solution (eBMS™)

Batteries, Monitoring, Installation “Cradle to Grave”

Carriers globally are challenged with managing their battery back-up networks cost effectively while maintaining high reliability. Eliminating annual battery testing, lowering battery cost, reducing management of battery programs in the field, and outsourcing a non-core function are all issues facing management.

Our Enterprise Battery Management Solution (eBMS™) allows companies the opportunity to outsource their complete battery process from procurement through battery replacement.

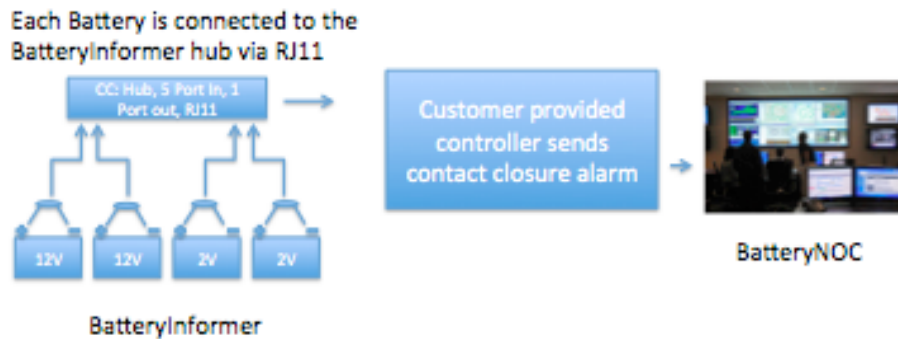

BatteryInformer® monitoring technology, together with Narada Power Sources batteries and installation services, offers companies a comprehensive enterprise solution to leverage their purchasing power which lowers their cost of batteries, installation and management.

Enterprise End-to-End Solution

Our turnkey solution includes the Narada NEBS approved batteries; BatteryInformer® monitors BatteryNOC™ monitoring, BattCare™ 5-year replacement warranty and our national DC power services. This end-to-end solution offers our customers an enhanced battery management processes at a reduced cost. Transferring the responsibility and cost associated with battery backup from the carrier to Mega-Power. This allows the carrier to focus on their network enhancements and business.

How It Works?

When purchasing our turnkey solution, we offer a full 5-year replacement warranty on 12-volt batteries. This means we manage and take responsibility from “cradle to grave” which includes installation, monitoring, maintaining and all warranties. Because of the BatteryInformer and Narada batteries, carriers can now outsource their battery backup with service levels never achievable before. Customers using our products and services will attest to our quality products, responsive service and corporate integrity.
